

# Structure of Dongfanghong-3 (DFH-3) Satellite

**1** A 6.5-metre-long solar battery (Fold along the central line and glue)

**2** A main body in box-form structure carrying 24 C-band communications transponders

**3A** A communications antenna with 2 metres in diameter

**4A** A communications antenna with 2 metres in diameter

**3B**

**3C**

**4B**

Cut along the edges carefully, apply glue to the parts with oblique lines, then follow the steps stated at the right side to fold and glue. A beautiful satellite will be completed soon.
